

IWV Emergency Net Preamble

QST, QST, QST, please stand by for the Indian Wells Valley Emergency Net
This is **your name and your call sign** net control for this evening.

The Indian Wells Valley Emergency Net meets every Monday night at 730pm, local time on the Sierra Amateur Radio Club WA6YBN repeater at a frequency of 147.00 MHz, + offset and a PL of 107.2 Hz with the exception of the second Monday of the month when the Sierra Amateur Radio Club holds it's meeting. Should the repeater be non operational the net will meet on 146.55MHz, simplex.

(BREAK)

The purpose of the net is to:

- 1) Pass emergency or priority traffic
- 2) Test and maintain the emergency capabilities of the Indian Wells Valley Amateur Radio Community
- 3) Provide a forum for passing information of interest to local amateur radio operators

Is there any emergency or priority traffic, please go now
(acknowledge and handle any traffic)

Are there any announcements?
(Take the call signs of those who have announcement then go to each on and ask them for their announcement)

This is **your call sign** net control

Check in follows

Are there any visitors or newcomers to the valley, please go now
(acknowledge any new visitor or newcomers by their call sign. Ask for name and for them to say a few words about themselves and if they wish to stick around for the round table)

Are there any check in via mobile or Echolink , please go now
(acknowledge any mobile or echolink checkins and if they wish to stick around for the round table)

Regular Check In follows. Please give your call, if you have traffic and if you wish to participate in the round table. Please go now
